Here is the Astro Chart you requested:

Hi there, here is the interpretation of the astrological chart that you asked for. Also attached is a .GIF graphic file which depicts your chart wheel. Thank you for visiting the Astrolabe WEB site at <http://alabe.com> This report has been created especially for you. It represents your Unique picture at the time you were born and at the place you were born. If you are unsure of the exact time of day of your birth (or the date or the place), the reading will probably not seem as accurate as it could be in certain places, but other parts will seem to be very appropriate. You will notice at certain places in the reading that contradictory information seems to be given. This is to be expected, because the personality of most people is extremely complex. For example, at times we are quite shy and at other times we are very aggressive, and so forth. You will also notice that, at certain points in the reading, certain patterns may be repeated over and over, especially in a longer more detailed report than this one. This is also to be expected.

This simply means that your horoscope has an extremely strong focus on this particular pattern and that you should pay extra close attention to what is said about it. Now, on with your Report!

Rising Sign is in 13 Degrees Virgo

You tend to be very shy and not very self-assertive. You are supercritical about how you appear to others. Even though you may think you are uninteresting and dull, you are actually quite soft-spoken, orderly, neat and very likable. You are a perfectionist with high standards, and at times you can be quite tactless in pointing out the faults of others. Very practical, efficient and purposeful, your appearance and bearing reflect your need to appear graceful, sensible and reserved. You have a crisp, no-nonsense approach to dealing with others. Never lazy or self-indulgent, you tend to be dedicated to the work ethic.

Sun is in 00 Degrees Gemini.

You have a quick, bright and agile mind, but an extremely short attention span. You love the external, kaleidoscopic aspects of life, but you tend to avoid (and even fear) deep, close emotional involvements. As such, you seem to enjoy travel and sightseeing and generally being "on-the-go." You get quite listless when things around you become static and dull, but your excitement returns whenever you are stimulated by a new idea. Chatty, inquisitive and quite playful, you enjoy practical jokes and games in general. Your moods change quickly and often -- you are very restless and constantly in motion. You are known for your versatility and adaptability. Your vivaciousness enlivens any social gathering.

Moon is in 17 Degrees Gemini.

Restless in the extreme, you are easily bored because of your short attention span. Your emotions change rapidly and you love to talk about your feelings. Generally, you have good judgment -- your intellect controls your emotions and you do not overreact emotionally to things. A good jack-of-all-trades, you have many-sided interests and enjoy reasoning things through. With your mental agility and need for physical mobility, you are attracted to traveling and learning about other peoples and cultures. You have vivid powers of emotional self-expression -- you can be a nonstop talker. You love to share your ideas with anyone who will listen.

Mercury is in 05 Degrees Taurus.

A slow and careful thinker, you like to present ideas visually and concretely. Abstractions are quite difficult for you to understand. For you, everything must be practical and useful in order to merit your attention. You are a perfectionist -- you enjoy being skillful enough to handle the dexterity required of fine craftsmanship. Cautious and conservative in your thinking, you are very slow to change your opinions. You are more apt to respond to an appeal to your feelings than to an appeal to logic or reason.

Venus is in 25 Degrees Gemini.

You are friendly, warm, open and tolerant toward others. You love variety in relationships, indeed you may even prefer to maintain more than one relationship at a time! Very witty and humorous, you have the ability to amuse and please others. This makes you quite popular. You love to play the field and thus find it difficult to settle down and make any deep emotional commitments. Your innate charm and vivacity makes you welcome most everywhere you go.

Mars is in 08 Degrees Cancer.

Your moods are very important to your overall well-being. You are confident and self-assertive when you are feeling upbeat, and you are retiring, irritable and grumpy when you get depressed about anything. Very sensitive, you wear your heart on your sleeve. You are easily angered whenever you think someone has slighted you. It is best for you to show your anger immediately and let it all out, rather than to try to hold it in or to hold grudges for a long time. You're extremely loyal and defensive of your family, neighborhood, community and culture.

Jupiter is in 09 Degrees Virgo.

You feel most expansive and at ease with yourself when you are doing something that you consider to be practical or useful. You enjoy being dutiful and carrying out responsibilities. You gladly take on the little tasks that others seem

to want to avoid. At times, you carry things to extremes and feel guilty anytime you do something that you consider to be self-indulgent. While it is appropriate for you to demand little for yourself in life, try to loosen up once in a while -- go out on a fling and enjoy yourself!

Saturn is in 10 Degrees Cancer.

The most important issue for you is emotional security. You have a deep and gnawing fear that those on whom you depend for emotional support will prove to be unreliable in the long run. When you are unloved and insecure, you distrust others and tend to feel isolated and lonely. Very cool, detached and objective, you can be counted on -- in situations that are inherently stressful or full of tension -- not to lose your self- control. That is a great and welcome gift at such times.

Uranus is in 06 Degrees Pisces.

You, and most of your peers, are extremely idealistic and want to change society by completely reorienting its highest religious goals and aspirations. Just be careful to make sure that your new goal structures are properly grounded in reality so that they have a chance of being accepted by the majority.

Neptune is in 15 Degrees Aquarius.

You, and your entire generation, will idealize and even venerate the ability to remain detached as well as the ability to objectively analyze any given situation. There will be a concerted effort on your part to cure the ills of society as a whole. But be very careful to continue to maintain and protect the rights of individuals in the midst of these potentially far-reaching changes.

Pluto is in 21 Degrees Sagittarius.

For your entire generation, society's cherished beliefs and totems will be radically changed. Many traditional concepts will be totally altered, if not completely destroyed. The rights of individuals to pursue their own course in life will be reasserted.

N. Node is in 11 Degrees Taurus.

It's not in your nature to seek out many casual acquaintances in your daily round of activities. You feel much more comfortable with a small, close-knit group of people -- those with whom you can relax and work toward known and clearly defined goals. Your loyalty to a person or group, once given, is forever -- you'll expend all of your quite considerable energy in seeing that the group stays together and prospers. You choose your partners and relationships so carefully that you're bound to gain certain advantages from them, including those of a material nature. Be careful though not to let mere self-service be your motivation in establishing your connections -- make sure that there's an even give-and-take!
